

TP - PUSH FIT FILLER BREATHERS

TPF - PUSH FIT FILLER BREATHERS WITH FILTER

TPF/BR - PUSH FIT FILLER BREATHERS WITH BRONZE FILTER

TPV - PUSH FIT FILLER BREATHER WITH VENT VALVE

1 = Air filter

2 = One way check valve

-Push fit breather with easy grip vertical ribs fit snugly into pre-drilled hole and seals by two O-Rings; hole tolerance 0,1 mm.

-Manufactured from Polyamide 66 ensuring high mechanical resistance at both low and high temperatures (max working temperature **100°C/212° F**).

-The polyurethane air filter is located under the lid, easy to remove, clean and reinstall; available also the model TPF/BR with sintered bronze filter, filtration degree 30 microns.

-Standard color is black, red lid, with encased the graphic "OIL FILL" symbol (TP-TPF); the TPV model fits a red lid with "one-way check valve" graphic symbol.

-The filler breathers TP-TPF have a large breathing capacity and are suggested to be used where a high volume of airflow take place (for example hydraulic systems that utilize high ratio high cylinders); not recommended for usage on mobile equipment, where strong movement of the oil tank is present.

-Anti-splash option available (model **TPF/18/AL**).

-The model TPV is equipped with a one-way check valve, which opens when an overpressure of about **0.30 bar** takes place in the tank; under normal conditions of working this valve remains closed.

Code	Code	Code	F	D	d
TP/18	TPF/18 (BR)	TPV/18	18	36	23
TP/20	TPF/20 (BR)	TPV/20	20	36	24
TP/26	TPF/26 (BR)	TPV/26	26	41	28
TP/30	TPF/30 (BR)		30	47	33
