48005118000	M18x1.5	19	22	12	60	12

S - Breather.
G - Fiber gasket.

This extended screw cap has a labyrinth of blades inside the body that prevents overflow. It is made of thermoplastic (Polyamide 66).
The maximum working temperature is +100°C.
It is recommended for applications where there is an intense movement of the oil and as a consequence the danger of leaks through the breathing hole (Ø 2.5mm). The combined action of the labyrinth and the high position of the vent prevents losses.
The cap is supplied as standard in black with a red cap with the inscription OIL and fiber gasket. Finished with a hexagonal neck that allows tightening with a wrench.
