EXTENDED RECEPTACLE FOR PRESS-FIT PLUGS PFP

Extension body with 1/2" BSP male thread and Ø18mm top hole for pressure components; can be used in combination with flat pressure caps 480061.

Thanks to this extension it is possible to raise the position of the respirator of the coupled cap and with this the possibility of leaks is reduced.

The extension is made of thermoplastic (Polyamide 66) and includes a fiber gasket.
